DETAILED ACTION

1. Claims 1-10 and 20-31 are pending.

Response to Amendment

2. Applicant's amendment filed 5/31/2005 necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1, 20, and 26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1, 20, and 26 recite “a near end password entered at a time of facsimile initiation” and “ a far end password entered at said time of facsimile initiation”, while the specification, page 4, lines 22-24, recites “ the comparison unit 101 is first adapted to compare a far-end password, received via pathway Ppw, against a near-end password stored in the comparison unit 101 or elsewhere within device 100 or within a device connected to device 100.”, emphasis added. That is to say, the near end and far end password entered at a time of facsimile initiation are not supported by the disclosure as originally filed.
